## **James & Weaver Plans Expansion for 2007**

“James and Weaver Office Environments continues steady growth year after year thanks to the consistency and quality of services we offer our clients,” says President Denise Powell. “I’m very proud of our staff who maintain the highest level of professionalism and service to every job they perform.”

Powell was pleased to be able to add two experienced sales and design staff members, bringing the total number of employees at their downtown Youngstown location to eleven. Over the last year, the company’s main business furniture showroom on Wood St. underwent a redesign.

With the launch of its updated website, the company expects the coming year to bring increased on-line customer activity. Additionally, a review of all manufacturer product lines ensured the company could continue to offer clients the best price and quality in all their furniture and design needs.

An exciting new venture for 2007 will be the opening of the new office furniture outlet facility at 350 Federal Plaza East in downtown Youngstown. Powell plans to offer product closeouts as well as used and flawed furniture to buy, rent or lease, beginning early in the new year.
